

中華民國獸醫病理學會第 303 次組織病理研討會

Chinese Society for Veterinary Pathology

The Three-Hundred-third (303rd) Histopathology Seminar

Date: Jan 14, 2011

Place: NCHU

Case 1. CSVP 2011-2623 (090621, National Taiwan Laboratory Animal Center, NLAC, T.Y. Chen, C.T. Liang)

Mouse, C57BL/6JNarl, female, retire breeder, showed no significant clinical signs. At necropsy, both uterine horns were obviously enlarged.

Case 2. CSVP 2011-2624 (NTU2010-624 B, NTU, Y. Lee, C.H. Liu)

Hemiechinus auritus (Hedgehog), 4-year-old, castrated male, swollen right cheek was noted.

Case 3. CSVP 2011-2625 (NTU2010-451B, NTU, H.S. Chiou, C.R. Jeng)

Feline, 6-year-old, mongrel, male castration. Right submandibular mass was noted for 2 months and the size become twice bigger ($4.5 \times 3 \times 2 \text{ cm}^3$) at 5/21. FNA of submandibular mass shows blood and normal lymphocytes. Right submandibular mass excision was done at 6/9, the mass size is bigger ($6 \times 5 \times 3 \text{ cm}^3$). A newly-bulged mass near right submandibular mass been palpated on surgery day ($4 \times 2.5 \times 2.5 \text{ cm}^3$), lymph node suspected. Excision was done and sent for pathology.

Case 4. CSVP 2011-2626 (NTU2010-718 A, NTU, H.J. Chang, P.H. Chang)

Phoenicopterus ruber (大紅鶴), male. The animal showed lethargy on Sep. 12th, 2010. The Veterinarian suggested isolation for treatment. The animal died on Sep.13th. The cut surface of the spleen has multiple white plaques, which are 0.1-0.3 cm in size. There were randomly distributed white, caseous substances on the surface of kidney.

Case 5. CSVP 2011-2627 (NTU-2010-652A, NTU, H.S. Liang, P.H. Chang)

Canine, 12-year-old, cocker, Fsp. Seizure 3 times in early morning (2 o'clock), went to private clinic at 5 o'clock and treated with sedative drug, but still seizure happened twice. Be treated with anticonvulsant, antibiotics, glucose, and fluid therapy at NTUAH. But partial seizure still noted during treatment. The patient shocked in next morning.

Case 6. CSVP 2011-2628 (2010-008-21, AHRI, Y.C. Tu, F.M. Wu, W.C. Hsu, K.R. Tsai, J.C. Chang, S.H. Lee)

Stray dog, 13-year-old, male castration, sudden died, a hard mass ($5 \text{ cm} \times 4 \text{ cm} \times 2 \text{ cm}$) near to mediastinum in thoracic cavity was noted.
