

# 中華民國獸醫病理學會第 334 次組織病理會議

Chinese Society for Veterinary Pathology

The Three Hundred and Thirty-Fourth (334th) Histopathology Seminar

Date: Nov 7, 2014

Place: NCHU

**Case 1. CSVP 2014-2815 (CO14-539 H2-1, GIVP NCHU, C.L Ho, H.K Chang, C.C. Lin)**

Pig, a formalin-fixed skin sample was submitted from a slaughterhouse. The outer layer was solid and wrinkled. Numerous protrusions were on the outer surface.

**Case 2. CSVP 2014-2816 (CO14-491a, GIVP NCHU, T.C. Su, C.Y. Lo, M.J. Lin, S.C. Chang, J.W. Liao)**

White Roman Geese (*Coscoroba coscoroba*), male, 6 to 7-week-old, sudden death occurred 6 days after transferring them from sandy ground to two high fences of stainless bed (fence was 55 m<sup>2</sup> and with a 12 m<sup>2</sup> water pool). The morbidity of geese was 0.19% (24/128) and the mortality was 100% (24/24).

**Case 3. CSVP 2014-2817 (CD14104, L.C. Su, H.C. Kuo, C.L. Chen, D.Y. Lo)**

Pig, aborted fetus of sow in middle stage of gestation. The sows showed clinical signs of abortion in early to mid-term stage of gestation and poor appetite. The morbidity was 10% (7/70).

**Case 4. CSVP 2014-2818 (2013-2167-4, AHRI, Y.C. Tu, S.H. Lee, K.R. Tsai, W.C. Hsu, J. C. Chang, S.C. Hu, Y.L. Lin)**

Ferret-badger, adult, was found dead near living house, Gukeng Township, Yunlin County. The animal was submitted for rabies examination.

**Case 5. CSVP 2014-2819 (NP-788, NTU, S. Kuo, W.H. Huang, C.H. Liu)**

Feline, mongrel, 10-year-old, castrated male. Inappropriate urination and a left adrenal gland mass were noted in August, 2013. CT scan revealed a L<sup>t</sup> adrenal gland mass with central necrosis on Dec. 9<sup>th</sup>, 2013. The mass showed close attachment to the renal vein and caudal vena cava, yet without invasion into blood vessels. There were no obvious signs of metastasis. Surgical removal was performed. Grossly, the submitted specimen was firm, capsule-bearing, solitary and in size of 1.0 x 1.0 x 0.8 cm.

**Case 6. CSVP 2014-2820 (NTU2013-2605, NTU, J.H. Lin, C.R. Jeng)**

Canine, Beagle, 10-year-old, Intact female. Having severe keratoconjunctivitis sicca and keratitis of left eye, which became bigger gradually. Enucleation was performed on 5/11/2013.
